OF THE MOON

# THE SCOPE - MARCH-APRIL

## TAURUS

Keep your eyes on your goals over the next two months, as you could take steps forward in your career and personal life. You'll get the chance to review some of your commitments and decide how you'd like them to move ahead. Just be careful with communications between March 23 and April 15, especially at work.

## GEMINI

The next two months are ideal for reviewing your commitments. A new project may catch your eye and you'll enjoy the opportunity to consider fresh ideas at work and to make changes in your general direction. An educational course could be just what you want to make headway. Be careful with communications, especially at work end of March through to mid-April.

## CANCER

You'll appreciate the opportunity to re-arrange some of your finances and work commitments, so that shared ventures can grow in new and exciting ways. You could decide to commit more deeply to a venture – or to someone – but must avoid signing contracts after mid-March if you don't wish to review them later. You'll enjoy spending more time with loved ones in April.

## LEO

Your relationships are due for an upturn; you may experience unexpected developments that enable you to see someone in a new context. You may share some of your common aims and ground in a new way. And, once the busy-ness of events in March settle, you'll appreciate the chance to create more stability.

## VIRGO

The Virgo Full Moon on March 2 will signal a fresh chapter in your personal life, especially if you were born early September. For some Virgos, this full moon will also kick-start a fresh approach to your everyday life, helping you find more work-life balance. And, if you've been on a financial roller-coaster, prepare to stabilise your finances to ease the stress on your nerves.

## LIBRA

Venus will spice up your love life over the next two months, which you'll appreciate. Along with this, you'll also enjoy the opportunity to spruce up your health and work routine. March will be especially excellent for finding more time for yourself.

## SCORPIO

The next two months are ideal for establishing a suitable budget so that you can weather the ups and downs of financial developments. A budget will provide you with more security. A short break early in April should be enjoyable. After mid-April, you'll appreciate the opportunity to boost some of your key relationships, providing the sense of stability you so appreciate.

## SAGITTARIUS

You'll appreciate the opportunity to take stock of your progress and happiness so far this year. You may wish to review some of your work and daily habits and consider how you might be more efficient. As key decisions arise, you'll feel ready to turn a corner.

## CAPRICORN

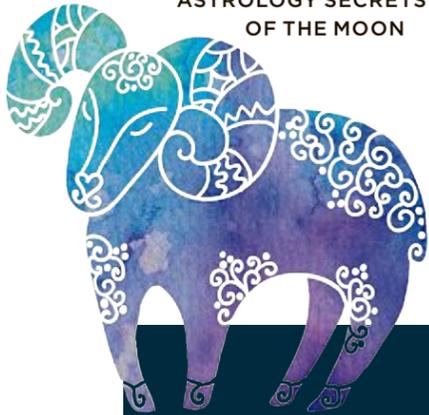

If you have a dream you have always believed in, this will be an excellent phase over the next two months to look at the viability of following your hunches. Fiery Mars will be in your sign from March 18 onwards, and you'll enjoy the vitality boost as a result.

## AQUARIUS

Choose your ventures carefully as they could take off over the next two months. If you're ready to commit to a new project, this will take your full attention over the coming months. You'll certainly enjoy reviewing your activities, potential and abilities – and deciding which you will focus on.

## PISCES

Make the most of love and money planet Venus in Pisces for the first week of March: take the initiative with new relationships or work projects. Be realistic about your work and bigger-picture goals over the following few weeks, and you could move mountains. Consider a new health routine to boost vitality: end of April could be particularly effective for improving health.

## ARIES

You'll appreciate a boost in vitality once the sun is in Aries from March 21 for four weeks. The full moon and blue moon on March 31 will spark a fresh partnership phase, where you could experience a more dynamic romantic life and the opportunity to find more balance and harmony in your collaborations.
