## THE SCOPE - MAY/JUNE

### ARIES

You'll appreciate the opportunity to adjust to fresh circumstances such as a new environment or daily routine, and you'll get your feet firmly on the ground. A group, friend or organisation should prove to be supportive over the next two months and, as you plan travel or the opportunity to embrace new circumstances, you'll blaze a trail with your customary lust for life.

### TAURUS

The big news this month is the entry of Uranus into your sign on May 16. Uranus will bring long-term change over several years, making the present an ideal time to consider your long-term financial plans and your shared resources; your collaborations and duties. The upcoming eclipses in July further point to the chance to broaden your horizons, so get set to implement plans.

### CANCER

May will be the ideal month to establish a more even keel at home, with family and the people you love. June will be a good time to leave an aspect of your past firmly behind by consciously focussing on the present. Try creating a great new look for yourself for example; or find a new approach to someone who is problematic, as a fresh profile and attitude will usher in a new era.

### LEO

Upbeat and dynamic Mars in your partnership zone will spruce up your relationships – both at home and at work. A therapeutic development at home or concerning someone close will help boost your inner resolve and dynamism. You'll appreciate the opportunity to turn your work or daily life around so that it is more to your liking: stable while also being spontaneous.

### VIRGO

You'll appreciate the opportunity to boost your health over the next two months, and also your financial circumstances. June, in particular, will be an excellent month for networking at work, which could further improve your financial situation. You may benefit from reviewing financial duties in preparation for a truly dynamic opportunity to come your way in July.

### LIBRA

Long-term changes in a key relationship may arise mid-May, so

prepare to be hands-on about finding more peace in your life by planning beautiful events. You may be in line for considerable developments over the next two months, unless you've already experienced these recently. You'll feel encouraged to seek a more stable phase. Be prepared to crack some eggs to make an omelette!

### SCORPIO

Add a spritz of excitement to your relationships in May. You may feel restless and you'll enjoy exploring ways to add more fun into your closest partnership. A partner – business or personal – may surprise you in May; and the net effect will be that you will begin to look for more stability in June. Set out to create more work-life balance.

### SAGITTARIUS

The Sagittarian Full Moon end of May will stimulate your need to change some elements of your life, especially your personal life. For some Archers this Full Moon will stimulate financial growth, and you should feel all the more able to implement some of your money-making ideas. You could boost work and health in May – and your romantic life in June.

### CAPRICORN

The more diligent you are over the next two months in following your intuition and pursuing cherished goals, the better for you. You'll feel ready to make a deep commitment – perhaps even to pursue your own goals. The Capricorn Full Moon on June 28 will point to a fresh chapter and this could provide more stability.

### AQUARIUS

Dynamic and upbeat Mars will be in your sign from mid-May onwards, infusing your life with more energy and motivation, so the next two months are ideal for putting your plans in motion. Both your work and your personal life could flourish in coming weeks, but you must be ready to make an extra effort, especially in relationships and regarding domestic developments.

### PISCES

The following months could be truly inspiring, especially if you follow your instincts and set out to engage in activities that set your heart racing. Travel, new topics to study, spiritual interests and even legal matters could inspire you to try new ventures. In June, the focus may switch to your home and career.

## GEMINI

Venus in your sign until May 18 will add focus to the importance of getting your finances right. When you are sure you have crossed the t's and dotted the i's, you will be ready for considerable change, especially in areas you share such as duties and agreements. Romance could blossom during May, too. You'll soon see that all your hard work will lead to greener pastures.
