

YOUR MONTHLY horoscope

BY PATSY BENNETT, WWW.ASTROCAST.COM.AU

ARIES

It's time to get busy – and to enjoy life! It's time to focus on you, yourself: on your image, your looks and the way you present yourself – and then to make some money, too! The lunar eclipse on April 4 could refresh a relationship or a partnership, be this business or personal, and communications will become busier in May.

TAURUS

You'll enjoy the feeling that you'll regain a sense of purpose over the next few months as Venus moves through your sign and into your money and communication zones. Life's luxuries and delights will appeal more than usual; and a partner's or co-worker's circumstances may affect yours, too. The Full Moon on May 4 will bring both couples and singles more passion.

GEMINI

You'll gain a sense of achievement, as the lunar eclipse on April 4 will spark a fresh collaboration or the opportunity to step up at work and with your goals. If negotiations are necessary, ensure you use your talent for diplomacy. Finances and discussions with a group or a friend will merit careful handling. The New Moon on June 17 will open doors: get set to walk through them!

CANCER

Vital areas of your life are set to step-up. In the process, even if you plan ahead, don't

deny your emotional process; you will benefit from supportive nurturing and time out. When emotional and financial decisions overlap, this can be trying, but bear in mind that life will blossom, despite challenges, especially when, in June, a new door to an entirely new phase could open.

LEO

You'll enjoy the sense that you'll regain your joie de vivre over the next few months. Synchronicity, and potentially also abundance, will once again figure in your life, and you'll truly feel that the ball is rolling by the end of June, when an unexpected opportunity could arise. Meanwhile, get set to implement plans in April and May, to make the most of an upward swing.

VIRGO

April's events will motivate you to spruce up your love life and your relationships in general, especially around the New Moon on April 19. Moving into May, being practical about shared assets, finances and duties will help you to make the most of developments in June which will encourage you to try something new such as a holiday; or a fresh chapter at work.

LIBRA

The lunar eclipse on April 4 suggests you're ready to turn a page within a key relationship, business or personal. By

mid-April, you'll see better where, in your life, you could be more outgoing and adventurous. A key decision to do with work or your personal life will merit careful thought. By the end of June, you'll achieve a goal, most likely connected with someone you love.

SCORPIO

Keep your eyes open to opportunities in April through to June, as celestial influences suggest that you could step up, especially at work, with your career and status. Developments may come out of the blue, so be ready to put your hand up. May's stars are largely about re-connecting with someone close; you may decide to alter the parameters of key relationships as a result.

SAGITTARIUS

Nothing slows a Sagittarian down more than feeling your favourite, larger-than-life projects and plans could be limited in some way. So you'll enjoy the sense of liberation you'll feel as April gains momentum; as travel, favourite projects and interests which have been stuck begin to free up. June will be all about your relationships: singles may even meet that someone special mid-month.

CAPRICORN

You'll enjoy being with people who spice up your life. Whether you travel or you receive

visitors, special people will prove their weight in gold. A change at work, within your living space or regarding a collaboration will provide food for thought. As you become increasingly motivated by the company you keep, you'll enjoy devoting your energy to health and fitness in June.

AQUARIUS

Jupiter should bring a little more abundance your way after mid-April, and someone close will be on your mind, and in your heart as a result. You'll sense that people become more interested in you, too. If relationships have been strained recently, prepare for these to gain clarity, especially as you head into June, as you'll get the chance to revitalise both your home and personal life.

PISCES

Many of your decisions will revolve around what you share – and what is yours. Could it be time to put a stake in valuables and possessions – even if your heart is far more philosophical and far less materialistic? Would being practical be such a disadvantage? Whether work, fun or someone else grabs your attention, you'll feel motivated to create stability in the bigger picture long-term.
