

# YOUR THREE-MONTHLY horoscope

DISCOVER WHAT THE STARS HAVE IN STORE FOR YOU OVER THE NEXT THREE MONTHS WITH ASTROLOGER PATSY BENNETT. WWW.ASTROCAST.COM.AU.

## ARIES

MARCH 21 – APRIL 20

Your trajectory is upwards as you leave 2014 and you travel like a high-speed train into 2015. Ensure you have the energy to keep up the momentum, or tensions around the New Year risk bringing more fire your way than fireworks. Otherwise, your career, status and general direction will continue upwards; and early February could bring deeper connections your way, too.

## TAURUS

APRIL 21 – MAY 21

This time of year is all about creating harmony and December will foster a nostalgic atmosphere, especially around your home, family or property. You may revisit an old haunt or shed a sentimental tear over a reunion in December. January is all about renewal, and 2015 could be truly life-changing. You'll get the chance early February to practise what you preach.

## GEMINI

MAY 22 – JUNE 22

The Full Moon on December 6 will highlight a personal ambition that could change your life. For many, this will be to do with work; for some, with a relationship. Mid-December may be a different story; avoid conflict and ensure you move into 2015 with a clean conscience. Work towards stability in 2015; and early February could bring a real boost your way, financially or in your personal life.

## CANCER

JUNE 23 – JULY 23

This time of year is particularly close to your

heart; the Sun in Capricorn brings people you love closer to you and this year, the festive season promises to renew ties and your love-quota. Face developments mid-December pragmatically, and any hurdles will prove to be blessings in disguise. In 2015, you can gain security and stability, even if, at first, this appears to be limiting or truly the opposite.

## LEO

JULY 24 – AUGUST 23

Get set to step up a level, especially domestically or with respect to a property. If you prefer life to hum along at an even pace, arrange calming activities, because the next few months could be both fascinating – and are likely to involve upheaval. Your new direction will include fresh commitments, especially around the New Moon on January 21 and the Full Moon on February 4.

## VIRGO

AUGUST 24 – SEPTEMBER 24

The next three months will resemble a kind of time-travel capsule as you'll revisit the past – by way of a trip to an old haunt and reunions – and you'll also make dramatic headway, especially in the New Year and mid-February. It's as if you'll get a second bite at a cherry, be this at work, with a particular opportunity or even with a relationship. Choose wisely.

## LIBRA

SEPTEMBER 24 – OCTOBER 23

You'll enjoy seeing life from a fresh perspective as you sail into 2015. A new circumstance or a break away will provide

you with food for thought as you get in touch with your true wishes and goals. You'll feel tempted to make a break with tradition or to hitch your dreams on a hunch. A fresh phase will begin in your personal life and February could prove decisive as opportunity knocks.

## SCORPIO

OCTOBER 24 – NOVEMBER 22

Get set to juggle several balls in the air and to show just how capable you are. Strive for balance or you'll risk spreading yourself too thin, allowing tough celestial aspects mid-December to disrupt your careful plans. A fresh financial phase suggests you can attain more stability.

## SAGITTARIUS

NOVEMBER 23 – DECEMBER 21

The Full Moon on December 6 signals a fresh relationship cycle, which will allow you more freedom and flexibility, while still enabling you to fulfil your duties and commitments. Your daily schedule and health routine will present more variety in life, which will appeal to your sense that 2015 will provide the chance to broaden options at home or with family.

## CAPRICORN

DECEMBER 22 – JANUARY 20

Put your values and desires up front and ask: will my wishes come true in 2015? The New Moon on December 23 says, yes, they will, especially where relationships are concerned, as your goodwill will ensure you nurture the people you love in 2015; not forgetting you, yourself. February signals a new phase as you leave behind

practices which no longer serve a fulfilling purpose.

## AQUARIUS

JANUARY 21 – FEBRUARY 19

The New Year invariably involves a fresh chapter; but 2015 will be different. You'll have the chance to truly reveal a new destiny, to pursue your higher ideals and goals which resonate on a deeper level. The New Moon on February 19 could prove particularly transformative in your personal life or work.

## PISCES

FEBRUARY 20 – MARCH 20

How practical are you? You're better known for your romanticism and idealism. But you're a realist, too, and the next three months will enhance this quality, enabling you to make positive, informed and long-term decisions, especially when opportunities arise early December and early January. February will kick-start an ideal scenario, which could become very real, too.
